S 000	INITIAL COMMENTS The following citations represent the findings of an abbbreviated survey with complaints #166916, #166648, #166665, #166598, #166498, #166342, #166048, 165601, #165122 conducted at the above named assisted living facility on 12/29,30/2021 and 1/4/2022.	S 000		
S3299 SS=F	26-41-206 (e) (1) Facility Food Storage (e) Food storage. Facility staff shall store all food under safe and sanitary conditions. (1) Containers of poisonous compounds and cleaning supplies shall not be stored in the areas used for food storage, preparation, or serving. This REQUIREMENT is not met as evidenced by: KAR 26-41-206 (e) The facility reported a census of 107 residents. Based on observations and interview the facility failed to ensure food was stored under safe and sanitary conditions as evidenced by observations of mice droppings where food is stored. Findings included: - Observation on 12-29-21 at 2:37 PM revealed a blue plastic floor shelf that had containers of corn meal and sugar sitting on it. The shelf had a large amount of mouse droppings all across the top of the shelf. Dietary staff B stated she was not sure what they were. At 2:46 PM maintenance staff A confirmed the droppings on the blue shelf were mice droppings.	S3299

He looked in the mouse trap under the pan storage area, and noted the last time the trap had been checked or changed was 11/12/21.

At 6:30 PM on 12/29/21 surveyor informed administrative staff D of the concerns with mice droppings in the food storage area and she stated she would contact the pest company.

On 12-30-21 at 10:50 AM surveyor observed the same blue shelf and it still had multiple mouse dropping on it. The area had no other obvious signs of mice.

At 10:55 AM on 12-30-21 dietary staff B reported she had taken the shelf outside yesterday and washed it and would wash it again.

Review of the pest service report dated 12/31/21 revealed during service the serviceman identified active pest activity during service, which included: 3 repeater traps in the storage area in the kitchen had 15 mice between the three traps. Exterior area mice noted during service activity noted in exterior bait stations. The report also included concerns that could cause pest problems, such as: staff propping the door open for extended time using rocks to keep doors open, gaps in the wall by the mop sink and a few holes in the back maintenance room behind the kitchen that could be used by pests. The same above suggestions for the prevention of pests was on the 11/12/21 report.

Observation on 1-4-22 at 9:30 AM revealed a shelf with sweet corn muffin mix all over it and as dietary staff C removed the bags to be able to clean the shelf it revealed the bottom bag had a hole chewed in it about the size of a nickel. It also revealed mouse droppings in the muffin mix

S3299	Continued From page 2 on the shelf. Observation in the corners of the storage room revealed mouse droppings in both corners and seasoning containers on the floor in one of the corners. There was a sticky substance spilled around one of the crates which had a box of food on it. On 1/4/22 at 9:45 AM dietary staff B and licensed nurse E looked in the dry food storage area and when dietary staff B say the mice droppings on the shelf in the corn muffin mix she just said "oh my" The operator failed to ensure all foods were stored in a safe and sanitary condition.
